

# Help-Yourself Ribbon Box

This easy-to-use ribbon dispenser holds 5 spools of colorful ribbon—25 yards in all! The box is specially designed to keep the ribbon clean and tangle-free. Children simply pull out the color they want and cut off the length they need.

## Setting Up the Ribbon Box

The spools are already loaded in the box, so all you have to do is thread the ends of the ribbons through the grommets in the front of the box. (**Note:** It's easier to push the ribbon through the grommet if you wrap a piece of tape around the tip.)

Refill ribbon spools are available from Lakeshore. (To order, visit our website or call the number below and ask for item number LL668.) To reload the box, see the back of this page.

*(continued on back)*

# Refilling the Ribbon Box

1. Open the box and remove the used spools and dowel by pushing the center spool away from the grommets while lifting the dowel up and out of the brackets. (Pull any remaining ribbon back through the grommets if necessary.)
2. Slide the empty spools off of the dowel and replace them with full spools from the refill pack.
3. Position the dowel over the openings in the tops of the brackets and drop it in. The ends of the dowel should lock into place in the brackets.
4. Thread the ribbon ends through the grommets, close the lid, and you're all set!
