

Extra-Wide Adjustable Pocket Chart Stand

Assembly Guide

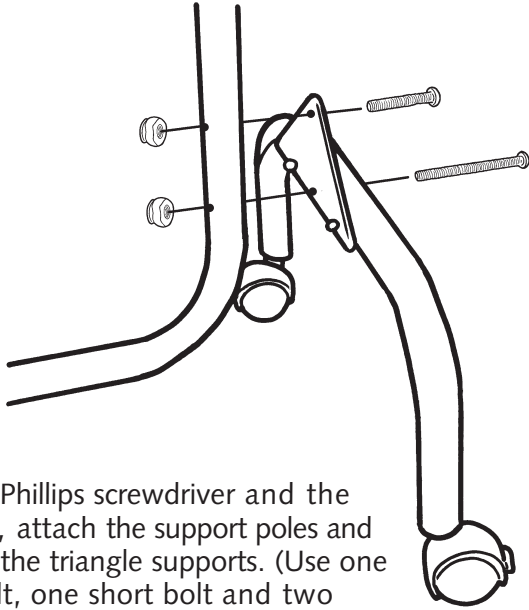

What's Included

- 2 triangle supports
- 2 locking knobs
- 8 nuts
- 6 short bolts
- 2 legs
- 2 adjustable side poles
- Wrench
- 2 long bolts
- 2 blue support poles
- 2 end stops
- 5 pocket-chart hangers
- Base
- Crossbar

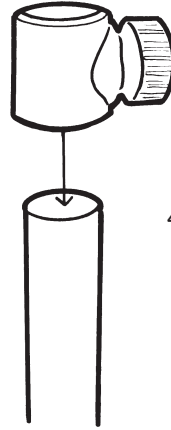

Note: To assemble this chart stand, you will need a Phillips screwdriver.

(continued on back)

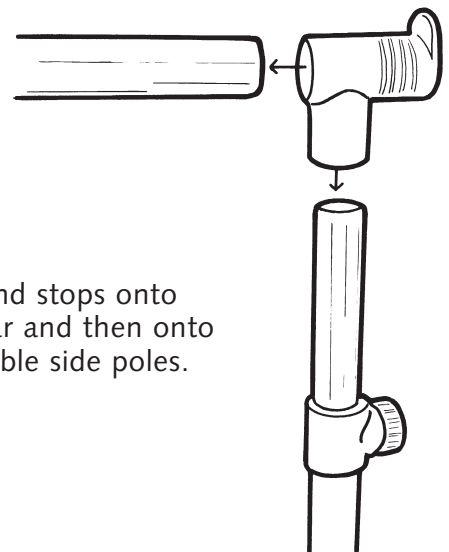

3. Using a Phillips screwdriver and the wrench, attach the support poles and base to the triangle supports. (Use one long bolt, one short bolt and two nuts per side.)

4. Slide the locking knobs onto the support poles. (Align screws in locking knobs with holes in support poles.)

5. Slide the adjustable side poles into the locking knobs and adjust to equal heights. Tighten each locking knob to secure the adjustable poles in place.

6. Slide the end stops onto the crossbar and then onto the adjustable side poles.

Now that your stand is complete, attach the pocket chart hangers by pressing each hanger opening onto the crossbar until the inner "ring" is resting on the crossbar.
