

Let's Recycle Sorting Game

Directions:

1. Divide the class into groups of four.
2. Give each group a paper bag, a number cube, a set of game cards and a game mat. Have students cut apart the game cards and place them inside the bag.
3. Instruct students to take turns drawing a game card out of the bag and placing it onto the appropriate category on the mat. On each turn, the players will also roll the number cube to determine how many points they get for placing the card onto the correct category.
4. When all the cards are sorted into the appropriate categories, have the students total their points. The player with the most points wins!
