

# Positional Words Activity Pack

Here's an engaging way to reinforce listening skills and deepen students' understanding of positional words at the same time! As your students listen to clear, easy-to-follow directions and complete the activities on the reproducible sheets, they will get plenty of practice with positional words and prepositions. A summary of the recorded instructions and a full-color answer key for each activity make correcting students' work a breeze. There's even a reproducible chart for tracking each child's progress. Plus, the sturdy reclosable folder stores everything neatly and securely!

## What's Included

- *Listening & Following Directions* audio cassette & CD
- 16 reproducible activities
- Activity summaries
- Student progress chart
- Answer key
- Storage folder

## Getting Started

Select one of the activity sheets and make photocopies for the children. Each child will also need crayons or markers, including red, orange, yellow, green, blue, brown, and black. Cue the cassette tape or CD to the beginning of the selected activity and provide headphones if you plan to have the children use them. Explain to your students that they should listen carefully to the cassette or CD and follow the instructions they hear. Then start the tape or CD—that's all there is to it!

**Note:** For your convenience, the activity pack includes both a cassette and CD version of the audio instructions. The cassette and CD feature the exact same recordings. On the cassette, Side A has the instructions for activities 1-8, while Side B features activities 9-16. On the CD, the track numbers correspond to the number of the activity. For example, track 1 features the instructions for activity 1 - Camp Out.

Vocabulary Words		
above	inside	across
below	outside	between
beneath	in front	through
under	behind	up
over	next to	down
in	beside	on
out	around	off
