

Missing Vowel Sounds!

Long Vowels

Instructions:

Have your child cut out the letter tiles along the dotted lines and place them faceup on a table. Start with one activity sheet. Invite your child to gather the letter tiles listed at the top and use them to complete the words on the sheet. Encourage your child to do this for all five activity sheets.

Helpful Hint:

Remind your child to use the pictures to help him or her sound out each word. Help your child understand the skill by explaining that when certain letters are combined—like the “ea” in “team”—they work together to create a long vowel sound. Often when two vowels are next to each other in a word, the sound they make is the name of the first vowel, and the second vowel is silent.
