

First Day Photo Frame

Showcase your students as works of art! Just take a photo of each student on the first day of school. Supply each student with a copy of the frame and ask the class to write their name along a frame edge. They can make them horizontal or vertical. Students can decorate their frames with markers, crayons, and colored glue. Provide scissors for students to cut out the center along the dashed lines and attach a 3" x 5" photo to the back of each frame using tape. You can hang the photo frames around the classroom or bind them together to make a back-to-school night album to show parents.
